My name is Jorge Sebastián Muñoz García, and I am a professional with a background in environmental sciences, with experience in frontend development, geographic information systems, and academic research. I am passionate about finding innovative solutions that connect technology with sustainability, and I believe my technical profile and values can contribute to the growth of your team.

Throughout my career in the environmental field, I have developed an analytical and research-driven approach, which, combined with my programming skills, allows me to tackle challenges from a creative and effective perspective. I have experience working with technologies such as QGIS, ArcGIS, Tableau, Next.js, TypeScript, and Node.js, and I am currently seeking to refine my knowledge and skills in mobile development.

In addition to my technical skills, I consider myself a person with a strong ability to work in teams, adapt to new environments, and learn continuously. My passion for nature and problem-solving has taught me to be a proactive and empathetic leader, capable of motivating others and achieving collaborative results.

Thank you for your time and attention. I eagerly look forward to the possibility of working together.

Sincerely,

Jorge Sebastián Muñoz García
